Radio guía

TG's - 2.4 GHz WIRELESS SYSTEM FOR GUIDED TOURS.

System of headsets-"whispers"- equipment, with several receivers the size of a thumb, and transmitters that bring together a set of unique features in guided tours.

This system allows two transmitters to communicate to the receivers at the same time, i.e. it allows two people to speak at the same time or to take turns to speak. All listeners can hear both people at the same time.

PERFECT SYSTEM FOR GUIDED TOURS.

1300mAh rechargeable lithium battery for the transmitter; 3H full charge, 12 hrs of use.

380mAh for receivers; 2 hrs fully charged, 7 hrs continuous use.

COMMUNICATION SYSTEM.

Transmitter disconnects all paired receivers with one click.

9999 IDs allows 9999 trip groups to operate simultaneously in the same area.

An unlimited number of receivers can be paired to one tour guide transmitter.

A SYSTEM FOR MULTIPLE GROUPS AT THE SAME TIME.

Worldwide license-free 2.4 GHz channels allow hundreds of groups to work in the same location as long as they are on different channels.

Supports 2 transmitters working simultaneously.

Receivers can listen to voice messages from two transmitters on the same channel.

Translation system for churches, museums, etc.

Can adjust the volume to a comfortable level without disturbing others

Adjust channels for all receivers simultaneously

AUX input socket for the transmitter of the guided tour system.

The transmitter supports a 3.5 mm AUX input, allowing you to connect an MP3 player, PC, phone, etc. as sound sources.

You can play background music or pre-recorded voice files using this function.

Flexible, strong and well-fitting ear hook for receivers.

Lightweight, 18g for each receiver, 70g for each transmitter

Clean and comfortable, no need to connect a receiver earphone to your ear

One click to mute all receivers.

9999 canales disponibles

100/200 M de alcance

1 click para silenciar
Todos los receptores

Sonido limpio

900mAh batería de litio
